## JANUARY 1, 1951 STOCKS OF DRY BEANS AND DRY PEAS

Stocks of dry beans on January 1, 1951 totaled nearly 17 million bags, according to the Bureau of Agricultural Economics. Of this total 14,860,000 bags (cleaned basis) were in commercial storage, while 2,106,000 bags (uncleaned basis) were still on farms. Total dry bean stocks were down about 1 million bags from a year ago. Commercial-stored beans declined only about 3 percent, while beans stored on farms indicated a drop of 23 percent from January 1, 1950.

Stocks of dry peas in all positions amounted to 2,668,000 bags, of which 2,445,000 bags (cleaned basis) were in commercial storage, while only 223,000 bags (uncleaned basis) were still on farms. Stocks in commercial storage are about the same as January 1, 1950, but farm-stored peas are down about one-third from a year ago.

The commercial stocks cover all dry beans and dry peas stored in commercial storage places in or near producing areas, including stocks owned by the Commodity Credit Corporation. Stocks in direct consumption channels are excluded.
